

Skills Pipeline

SKILLS FORECAST & IDENTIFICATION

FORECAST & IDENTIFY

Analysis of industry macro and micro economic factors to identify existing and emerging workforce skill needs. Evidence-based, industry validated forecasts of skill demand to inform potential VET system response.

SKILLS STANDARD DEVELOPMENT

POLICY & GOVERNANCE

NATIONAL SKILLS FRAMEWORK

DESIGN & DEVELOP

Policy & Governance. Policy direction and decision-making for Australia's VET system. Oversight of VET regulation, skills standards development, quality assurance and industry engagement.

Skills Standards Development. The development, endorsement and review process for nationally agreed training products including Training Packages, Qualifications, Units of Competency, Skill Sets and assessment requirements to an agreed quality standard responsive to industry's existing and future demand for skills. Accredited courses exist in areas not covered by nationally agreed training products.

National Skills Framework. Includes the Australian Qualifications Framework and VET Quality Framework for registration and monitoring of Registered Training Organisations (RTOs). Administered through a network of eight state and territory governments and the Australian Government, along with industry, public and private RTOs.

RESOURCES DEVELOPMENT

IMPLEMENTATION

RTOs develop learning and assessment strategies for delivery and gain approval from regulator to deliver associated qualifications. RTO ensure sufficient staffing, resources and facilities to accommodate and support the number of learners undertaking the training and assessment.

TRAINING DELIVERY

DELIVERY

Nationally recognised, high quality training and assessment delivered by RTOs which is compliant with regulatory requirements and meets the needs of industry and learners. Delivery may be funded by governments, enterprises and/or individual learners.

SKILLED WORKERS

OUTCOME

A timely flow of skilled labour which meets the evolving demands of Australian industry and the economy more broadly. Opportunities for individuals to continuously build further skills and knowledge to aid career progression and participation in new and changing industries throughout their working life.
